SUMMER SOLSTICE FACTS

- The Latin words "Sol" and "Stice" mean "sun" and "to stand still."
- The Summer Solstice marks the day with the most daylight and the shortest night of the year. Usually, there are about 14 hours of sunlight on this day.
- The ancient Celts celebrated this day with dancing, feasts, parties, and bonfires to encourage the sun's energy for good harvests and prosperity.
- While people in the Northern Hemisphere celebrate the Summer Solstice, those in the Southern Hemisphere celebrate the Winter Solstice.
- If you jump over a solstice fire, good luck will come your way for the rest of the year.
- The Summer Solstice is the middle of summer and the day with the most daylight, but after this day, the days will start to get shorter and the nights longer.
- More than 70 countries worldwide celebrate the Summer Solstice, including places in Europe, Africa, Australia, the United States, and Asia.
