FUN FACTS ABOUT NOVEMBER

1. Where did November come from? Novem is the Latin word for nine. But wait, isn’t November the 11th month? Before January and February were added to the calendar, November was the 9th month. Instead of changing November to Unidecember (Latin for 11), they kept the name. There you have the most confusing of all the November facts!
2. Rock the vote! We all know the presidential election is always in November, but do you know why? It comes down to the farmers. Not wanting to disturb the planting, growing or harvest seasons, the month of November was chosen as the most logical month for everybody to be able to vote.
3. No love for November! Here is one of the more intriguing fun facts about November: it is the only month that Shakespeare never mentioned in all his plays and sonnets. We are not sure why Shakespeare shunned November. Was it just a coincidence or was November really that uninspiring?
4. Two of the most popular toys were first released in November, the board game Monopoly (1935) and the Easy-Bake Oven (1963). Also, the first x-ray was invented in Germany in November 1895, and King Tut’s Tomb was discovered on November 4th, 1922.
5. On November 19, 1863, President Abraham Lincoln delivered the Gettysburg Address at the consecration of the National Cemetery at the site of the Gettysburg battle. While Lincoln’s speech was just two minutes long, it summed up everything important there is about democracy. Interestingly, Lincoln was in the middle of a minor bout of smallpox while he gave the speech and looked drained and ghost-like.
